

Special Seminar

SOLIDWORKS

Instrument Design and Modeling

Wednesday, June 12 2 P.M., Rm 202 NSH

Founded in 1995, DASI Solutions assists emerging sector companies and academic institutions with the implementation of CAD, CAE, and PDM collaborative technologies used in the product development process by the designing engineer and scientist. DASI Solutions offers a host of Solution Partner software products that are tightly integrated with SolidWorks, ePDM, 3D Via Composer & Simulation along with DraftSight. DASISudios is a Stratasys Ltd. agent for 3D Printers and associated technologies. In this talk, we will discuss the enormous potential offered by our products for the design and simulation of scientific hardware for a variety of applications.
