Quantum Computing "DeMystified"
Presenter: Dr. Mark Jackson
Cambridge Quantum Computing
Thursday, September 6
3pm, Rm 202 NSH

The advent of Quantum Computing has been likened to the Industrial Revolution. Amidst the headlines and excitement however it is sometimes challenging to understand exactly what is going on. In this presentation we will try to break down the current state of affairs into easily digestible parts and provide the audience with an accessible understanding of the technology, its early applications, and possible timelines based on empirical facts rather than supposition.
