Monday, September 17

4:00 pm - Rm 123 NSH

A Historical Perspective on Molecular Imaging at Siemens Healthineers

It has been exactly 60 years since Hal Anger invented the Gamma Camera and ushered in the era of Nuclear Medicine. Since Molecular Imaging at Siemens Healthineers can trace its roots back to Anger's patent, I would like to present a historical perspective on the development of Molecular imaging through the years and the technology innovations at Siemens that supported this development.
