**Dr. James deBoer**  
**University of Notre Dame**

**Monday, March 18**  
**4:00 pm - Rm 184 NSH**

## ***Crossroads of Nuclear Physics Applications***

There is considerable overlap between reactions that are of interest for nuclear astrophysics, reactor research, and ion beam analysis applications. In this talk I will present preliminary results for several new measurements that have been made at the University of Notre Dame over last few years and discuss how they impact these different applications and fit into the world of nuclear data evaluation.
