

John A. Lynch Lecture Series

LIFE AT THE INTERSECTION OF PHYSICS, MEDICINE, AND LAW

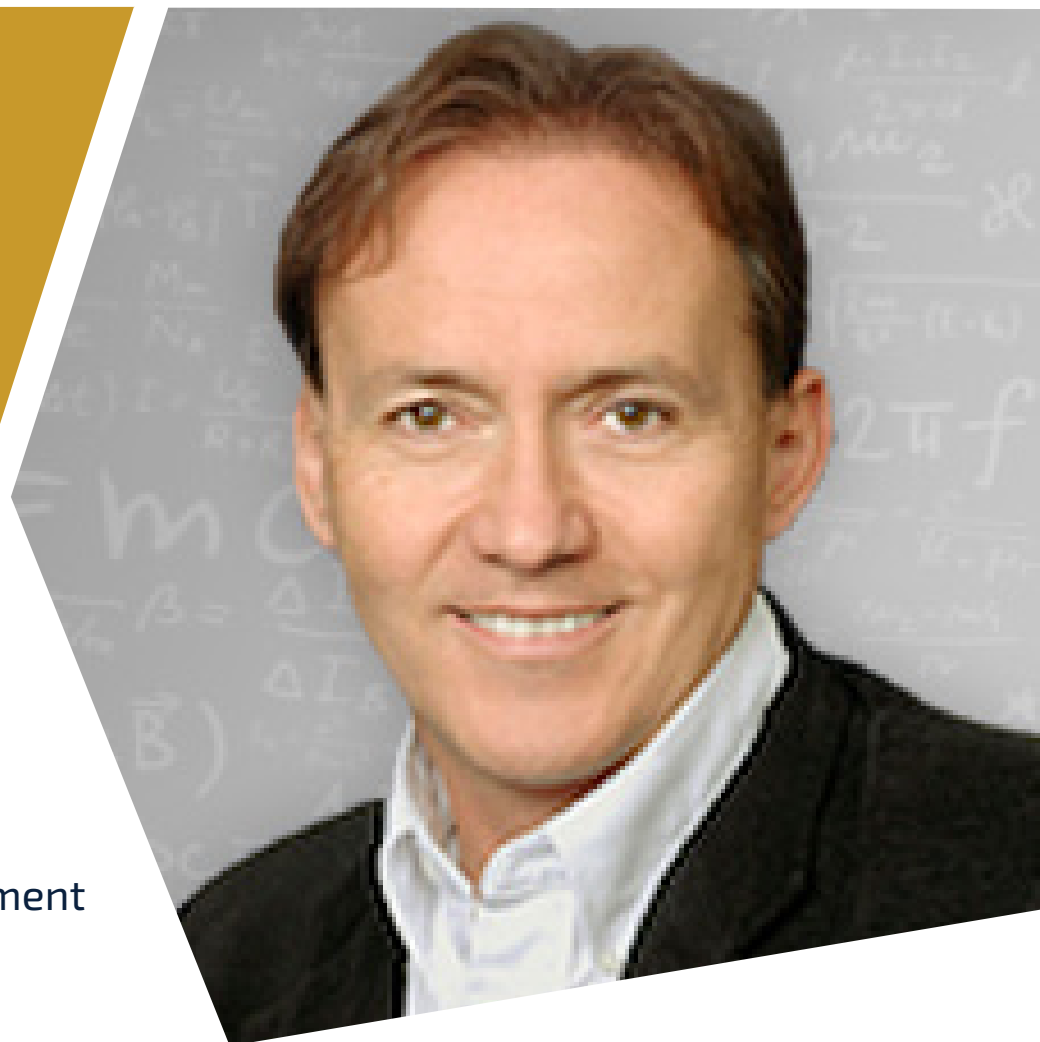

4 pm Wednesday, November 6
118 Nieuwland Science Hall

Reception to precede lecture at 3:30 pm
in 202 Nieuwland

Gergely Zimanyi, Ph.D.

Professor, University of California-Davis Department
of Physics

How can physicists develop competence to protect American inventions, and how can they start contributing to the exciting ventures of start-up companies? Zimanyi will share his research into the intersection of renewable energy problems, medical innovations emerging from the applications of femtosecond lasers in eye surgery, and patent law.
