

## NUCLEAR SEMINAR SERIES

---

**Maj. Gen. (Ret)**

**Robert H. Latiff, Ph.D.**

**Institute for Advanced Study,  
University of Notre Dame**

**Monday, February 10**

**4:00 pm - Rm 184 NSH**

### ***Future Peace: Resisting War in a Hyper-Connected World***

The talk will discuss the vast military enterprise, how it is so tightly connected via computer networks, and the evolution of automated and evolving, soon to be artificial intelligence mediated, command and control systems. Complicating the situation are a new, very aggressive and bellicose military posture and a large increase in weapons development and sales world-wide. With highly armed, antagonistic militaries facing one another all around the globe, and willing proxies ready to engage in violence, it is imperative that we do something to lower the pressure and mitigate the instability in the military situation. This work attempts to identify some actions we can take to do that.
