

## KISS: HEAVY METAL!

Prof. John Salzer  
Indiana University

Tuesday, April 3, 2012  
12:30 P.M. NSH 184

We describe our extensive program of spectroscopic abundance measurements for more than 1600 galaxies from the KPNO International Spectroscopic Survey (KISS). After illustrating how the abundances are derived, we show how they can be applied to the study of galaxy evolution.

Astrophysics  
Seminar

All interested  
persons are  
cordially  
invited to  
attend.
