

UPDATE OF THE FUKUSHIMA ACCIDENT: PHYSICAL EVENTS AND RADIATION EFFECTS

Dr. Jay LaVerne

Radiation Laboratory and
Concurrent Research Professor, Department of Physics
University of Notre Dame

Monday, April 23, 2012

4:00 P.M. NSH 124

This presentation will update the physical events occurring at the Fukushima nuclear reactor facility following the earth quake and tsunami of March 11, 2011. Most of the presentation is based on information obtained by a committee of nuclear engineers specifically set up to examine the destruction of the facility and release of radioactive materials. The focus will be on the events of the last year, but the long term clean up and radiation effects will be discussed.

Nuclear
Seminar

All interested
persons are
cordially
invited to
attend.
